Under35 \times After (β_3) shows the effect of the restricted access to abortion of mothers under age 35 compared to mothers over age 35. The estimates come from Equation (1), but control variables are not included. Sample size: 1124. Mothers under age 35 at the time of conception were 33.88-35.38 years old when giving birth. Mothers over 35 at the time of conception were 35.77-37.27 years old when giving birth.
